Title	The words "test drive" should have a standardization
Description	During the test drive booking stages, we come across "test drive" several times, in some cases we have the capital "t" and in others lowercase, as well as the "d", sometimes capitalized and sometimes lowercase.
Environment	<ul style="list-style-type: none"> <li>- <b>Production</b></li> <li>- IOS 16</li> <li>- Safari v16.5</li> <li>- Market: United Kingdom</li> <li>- Version: 6.0</li> </ul>
Steps to Reproduce	
Actual Result	There's no standardization regarding the "test drive" words
Expected Result	Should be a standardization regarding the "test drive" words

## **Improvements and/or Suggestions:**

### **Select a vehicle model view:**

- In the top bar, the steps to book a vehicle could already be visible.
- The name of the vehicle that is not the chosen one, is not greyed out like the one chosen, can lead to a misunderstanding, it could be greyed out like the one chosen.
- The close button could be in the middle, could improve de UX.

### **Select a dealer in map:**

- In this view, would be good if the user could search for showrooms near where he/she is.

### **Dealer detail's view:**

- Somehow improve the name of the dealer to prevent that one or few words appear in the line, like we have with "Tyne".
- The order of the icons at the top of the map could be at the same as that shown at the bottom.

### **Vehicle and motorization confirmation view:**

- The text shown below "Request a vehicle" could be justified, it would be better for UX.

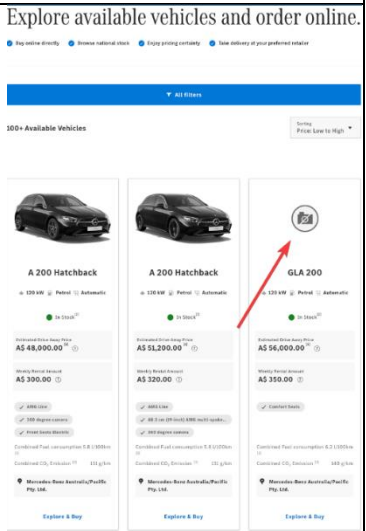

### **In the date and time view:**

- The text inside the button could be different, something related to the date and time, something like "Select this date".

Scenario #2: Search a vehicle

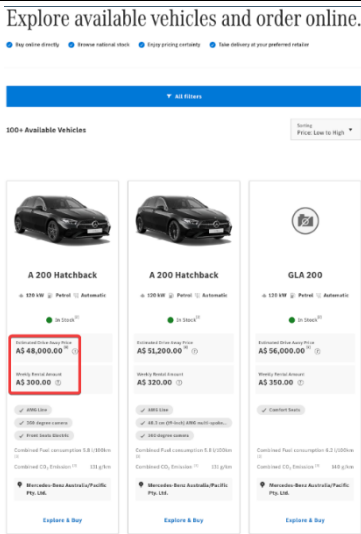

Use Case:

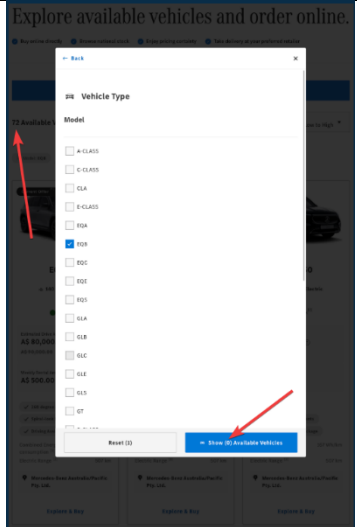

- Navigate to the search page
- Filter vehicles by vehicle type - EQB
- Observe the results
